

NICK ARMENIS

Fullstack Web Developer

Corfu, Greece | +30 694 699 4698 | armenisnick@gmail.com | linkedin.com/in/armenisnick | armenisnick.gr

SUMMARY

Full-stack developer with 8+ years of experience across custom WordPress projects, Laravel applications, and API-driven systems. Independent WordPress specialist delivering production-ready websites and WooCommerce solutions with a focus on custom design implementation, advanced functionality, performance optimization, and long-term maintainability. Also contributes to larger-scale, business-critical projects involving Laravel backends, React frontends, and third-party API integrations. Background in MVC architecture and modern JavaScript bridges frontend and backend work, delivering solutions that are functional, scalable, and maintainable.

SKILLS

WordPress & WooCommerce • Laravel & PHP • React.js & Modern JavaScript • Electron.js • REST API Integration
• MVC Architecture • Linux Server Administration • SQL • Python • Freelance Client Management

EXPERIENCE

iBS Informatics Business Services

Jul 2022 – Present

Full Stack Developer | Remote

- Develop and maintain WordPress websites, including custom themes, plugins, and integrations with third-party APIs.
- Implement updates and build new features for Laravel-based web applications.
- Design, build, and maintain cross-platform desktop applications using Electron.js for Windows environments.
- Collaborate with cross-functional teams to improve performance, user experience, and system reliability across multiple products.
- Notable project: contributed to Chronometro, the digital platform operating in the Hellenic Parliament — backend and frontend modules for real-time speaking-time management, microphone control, and secure interoperability with the Bosch Dicentis conferencing ecosystem.

Independent Freelancer — WordPress & Full-Stack Development

Jun 2015 – Present

Also active on Upwork as a WordPress Specialist since Aug 2025 | Corfu, Greece

- Build and maintain custom WordPress websites and WooCommerce stores for hospitality, car rental, and transfer businesses, with custom checkout logic and third-party integrations.
- Integrate WordPress with external booking and management systems, and build REST API connections for data synchronization with Laravel and external services.
- Optimize site performance, automate workflows, and troubleshoot complex technical issues.
- Maintain a limited client roster to prioritize quality, communication, and long-term collaboration over one-off tasks.

Super Markets Diellas

Jun 2018 – Jun 2022

IT Administrator / Web Developer | Corfu, Greece

- Developed custom PHP scripts for internal retail marketing processes and WordPress-based sites.
- Administered Linux servers and managed VPN network infrastructure.
- Built and maintained a PHP integration bridge between Singular Logic Galaxy ERP and WooCommerce.

Wdesign.gr — Web Design Agency

Sep 2013 – Jun 2015

Full Stack Developer | Corfu, Greece

- Built websites using WordPress and Joomla, including custom themes and plugins.
- Integrated APIs and payment gateways into WordPress and customized themes to client requirements.
- Provided ongoing technical support to clients.

Skrouz.gr

Oct 2010 – Apr 2011

Junior Front End Developer

- Worked with Skrouz APIs and Ruby on Rails applications.
- Developed with JavaScript frameworks as a member of Skrouz's mobile version development team.
